Objective — A results-driven **Computer Science & Artificial Intelligence** undergraduate, equipped with strong expertise in Artificial Intelligence and Algorithms, is seeking a challenging entry-level position. Eager to apply my technical and problem-solving skills.. to real-world projects within a forward-thinking organization.

Education

Noida Institute of Engineering & Technology

Bachelor of Technology in Computer Science and Engineering (AI)

Jul 2023 - Present

7.8 cgpa

Certifications

- Coursera - Use Canva to Create Desktop and Mobile-friendly Web Pages
- Infosys - Deep Learning for Developers
- Infosys - Building Machine Learning Systems with TensorFlow
- Infosys - Comprehensive Training on Unix and Linux OS Fundamentals

Projects

On-Road Vehicle Breakdown Help & Assistance

Aug 2025 - Present

- Developed a web/mobile application to assist users during vehicle breakdowns.
- The system connects stranded drivers with nearby mechanics.....and service providers in real time, using location tracking and a simple user interface.
- Implemented features for service requests, emergency contact, and live status updates to ensure quick and reliable roadside support.

Amazon Clone - Minor

Sept 2024 - Sept 2024

- Developed an Amazon Clone front-end using HTML, CSS, and JavaScript to simulate an e-Commerce platform.
- Implemented features such as product catalog, search functionality, shopping cart, and responsive design, ensuring a smooth and interactive user experience across devices.

Skills

• Languages

C, C++, Python, HTML, CSS, JS, SQL

• Tools

VS Code, Git/GitHub

• OS

Windows, Linux

• Soft Skills

Teamwork & Collaboration, Creative Problem-Solving, Effective Communication

Activities

Instructor, Introduction to Web Technology Workshop

July 2025- July 2025

- Conducted a 10-day workshop at NIET for 3rd-year engineering students, with 8 hours of training each day, covering Web Technologies including HTML, CSS, JavaScript, and practical applications.
- Facilitated hands-on learning with Visual Studio Code and browser-based developer tools to build and test web projects, fostering technical skills and innovation among participants.

Introduction to Advanced Python Workshop

Aug 2024- Sept 2024

- Conducted a 15-day workshop at NIET for second-year students, 8 hours each day, on advanced Python. Covered topics like OOP, file handling, and popular libraries (NumPy, Pandas, Matplotlib).
- Guided students with hands-on practice using Python IDEs and Jupyter Notebook to build real projects and improve programming skills.
